

Lithium bis(fluorosulfonyl)imide (LiFSI)

LiFSI as a promising salt for Next Generation Li-ion Batteries!

- Thermally stable up to 200 °C
- Highest conductivity: LiFSI > LiPF₆ > LiTFSI > LiClO₄ > LiBF₄
- High potential stability (3.0-5.0V vs. Li+/Li)

REF.	SALTS	PACKAGING
M0333A	Lithium bis(fluorosulfonyl)imide 99.9% LiF ₂ NO ₄ S ₂ ; [171611-11-3]; fw: 187.07; mp: 145°C H ₂ O ≤ 20ppm - packed under argon	50g 250g

BULK packaging or specific needs, please contact us.

Customised Formulations :

According our customers' needs, Solvionic formulates ionic liquids based electrolytes, conventional electrolytes or mixtures of both, including additives upon requests.
 For more information please contact us:
